

Telindus

Location: Camberley, Surrey, GU15

Value: £850,000

Size: 30,000 sq ft

Duration: 11 weeks

Telindus is a market leading ICT Solutions and Services Company employing over 2,700 employees worldwide.

Telindus were looking to consolidate their two offices at Hook and Odiham into one, in order to facilitate interdepartmental communication and improve business efficiency. In the initial stages of the project, Area Sq carried out a feasibility study on several properties to determine which one best suited Telindus's operational requirements.

The objective of the project was to create a practical yet functional and contemporary space to improve synergy between departments, from software engineers to sales and consultants.

Area Sq achieved this by incorporating graphic elements from the company's branding into the design to create a unique visual impact. A large central breakout area is strategically positioned as a central hub to encourage interaction.

Telindus' new facility also includes a 24 hour call centre, innovation labs and demonstration suits to showcase technology and client specific labs for Virgin Media and Cisco.

The office was furnished by Area Sq's sister company, Sketch Studios.

Mark Pettican, HR Director, ICT, Facilities & Governance at Telindus comments, "The ultimate question with any office refurbishment is "would you use them again?" The answer is yes, without question. Considerate, realistic, cost effective and Area Sq delivered on every level of this project from start to finish."
