

United Therapeutics

Location: Chertsey, Surrey, KT16
Value: £1.2m
Size: 25,000 sq ft
Duration: 13 weeks

United Therapeutics appointed Area Sq to manage the design and fit-out of their 25,000sq ft European Headquarters in Chertsey. The objective of the relocation was to consolidate their business operations, accommodate future expansion plans and create an inspirational place to work.

Area Sq worked closely with the United Therapeutics' project team members located in the UK and US to achieve an office design which was both functional and contemporary, incorporating the latest technology and quirky features.

United Therapeutics' objective was to put people at the forefront of the project and employees were consulted throughout the office design process and invaluable feedback was gathered.

The spacious, double high and light reception area boasts green glass feature walls and James Bond style seating and the conference room includes folding doors and modular furniture to enable multi-purpose use.

The open plan office area is light, spacious and comprises a central library area featuring an aquarium centrally positioned to be seen from all angles. Other facilities include a videoconferencing suite, a gym and shower rooms.

The environmental impact of the fit-out were minimised by using a combination of carbon neutral carpet and reuse of some of the existing floor covering.

Robert Grover, European Medical Director added "The process has been enjoyable and Area Sq, together with our project manager Keith Gibson of PPT, have done a fantastic job in coming up with a unique design and managing the whole process superbly."
